

Managed Services

SCOLA

Business Solution

SCOLA receives and transmits television programming from around the world in native languages. They wanted to be able to broadcast their content via the Internet and have the capability to archive their programs. This would allow users the capability to retrieve past videos and view on demand.

Technical Solution

SCOLA implemented a video streaming and archiving environment that consists of Windows and Linux Service along with VBrick encoders.

The technology deployed includes:

- IHP Proliant Servers
- Windows Operating System
- Linux RedHat
- Cisco routers, switches and firewall
- NAS storage

Services Provided

Responsible for the managing SCOLA's environment 24x7 including:

- System updates and patches
- Storage infrastructure for video archival
- Maintaining the hardware and software environment
- Monitoring the data communication lines
- Windows and Linux OS management
- NAS storage
- Network management
- Tape back up
- Disk storage

SCOLA

About SCOLA

SCOLA is a non-profit educational organization that receives and re-transmits television programming from around the world in native languages. SCOLA also provides other language learning content via this website. Universities, Colleges, K-12 schools, cable systems, government language schools and individuals use SCOLA content for current news, language study and cultural enhancement. SCOLA content is available via satellite, the Internet and cable providers.
